Over 10,000 GPS units are installed globally and now a cost effective model is available for your home!

EMSL ANALYTICAL, INC.
LABORATORY • PRODUCTS • TRAINING

EMSL Labs is a platinum rated laboratory by The Center for Disease Control and they have tested the effectiveness of Global Plasma Solutions' Products against the pathogens listed to the left. All testing was done in an environmental chamber, in an effort to simulate your home. The testing resulted in very high kill rates "in the space," which is shown below:

	<p>STAPH</p>	<p>About 25% of people normally carry staph in the nose, mouth, genitals, or anal area. The foot is also very prone to picking up bacteria from the floor. One type of staph infection that involves skin is called cellulitis and affects the skin's deeper layers.</p>	<p>STAPH - Reduced 96.24% After 30 minutes of the GPS Purifier Activation</p>
	<p>MRSA</p>	<p>MRSA is a "staph" germ that does not get better with the first-line antibiotics that usually cure staph infections. Once the staph germ enters the body, it can spread to bones, joints, the blood, or any organ, such as the lungs, heart, or brain.</p>	<p>MRSA - Reduced 96.24% After 30 minutes of the GPS Purifier Activation</p>
	<p>E. COLI</p>	<p>E. COLI is commonly found in the lower intestine of warm-blooded organisms. Most E. coli strains are harmless, but some serotypes can cause serious food poisoning in humans</p>	<p>E. Coli - Reduced 99.68% After 15 minutes of the GPS Purifier Activation</p>
	<p>CLOSTRIDIM DIFFICILE (C DIFF)</p>	<p>C DIFF bacteria naturally reside in the gut and some people accidentally ingest spores of the bacteria while they are patients in a hospital, or similar facility. The bacteria release toxins that can cause diarrhea, with abdominal pain, which may become severe. in rare cases this can progress to a life-threatening condition.</p>	<p>C DIFF - Reduced 86.87% After 30 minutes of the GPS Purifier Activation</p>
	<p>TUBERCULOSIS (TB)</p>	<p>TB most commonly affects the lungs but also can involve almost any organ of the body. Many years ago, this disease was referred to as "consumption" because without effective treatment, these patients often would waste away. Today tuberculosis usually can be treated successfully with antibiotics.</p>	<p>TB— Reduced 69.01% After 60 minutes of the GPS Purifier Activation</p>
	<p>AIRBORNE MOLD SPORES</p>	<p>Airborne mold spores are invisible to the eye, and they can easily flow through different areas of the home, especially heating and cooling system ducts. Health problems associated with high levels of airborne mold spores - allergic reactions, asthma episodes, irritations of the eye, nose and throat, sinus congestion, and other respiratory problems.</p>	<p>The Indoor Environmental Standards Organization has tested the effectiveness of GPS Products against AIRBORNE MOLD SPORES which were reduced 99.5%</p>  <p>Indoor Environmental Standards Organization</p>
